

Water and Wastewater Specialists

Automation Instrumentation Controls LLC is your source for Technical Support on Water and Waste Water Treatment systems.

We have over 25 years of experience designing, installing, servicing and supporting the Automation, Instrumentation and Controls used in Water and Wastewater treatment facilities. Based in West Jordan, Utah AIC LLC supports systems across the Intermountain West. Utah, Idaho, Wyoming, Nevada

We provide experienced technical support to assist your in-house maintenance and engineering staff.

We specialize in Allen-Bradley PLCs and IGNITION SCADA systems, but with 25 years of experience in the industry we support all brands of equipment and software including OPTO22, ScadaPack, GE, Wonderware and IFIX. If you have obsolete Allen-Bradley PLC5s we have a streamlined upgrade process to bring your facility up to modern supported control systems.

We are also factory trained specialists in utility radio telemetry and we can bring remote site data and controls to your control room or office.

We do new designs and installs, maintain existing systems and troubleshoot your problems. Give us a try, we always find the best solutions for our customers needs and budget.

At AIC LLC Lead Engineers Andy and Ken specialize in upgrading live systems.

We develop strategies to keep your critical treatment processes working 24/7 while we install upgraded electrical control systems. This is what your customers expect and we are part of your team to maintain critical utility function.

Planning a new facility or treatment unit? Give us a call, our experienced design and installation team will give you a quality, on-budget experience on your next project.
